PROFESSIONAL SUMMARY

Software engineer with 13 years of experience on the web, building modern applications end to end with intuitive user experiences, clean code, and scalable architecture. Has collaborated with enterprise teams, government agencies, and startups to deliver solutions built for real-world constraints: security, performance, and reliability at scale. Leads technical teams and translates complex business requirements into reliable software products. Uses AI as a coding partner for ideas, refactors, edge cases, and documentation, while staying accountable for the final decisions.

WORK EXPERIENCE

Software Developer (Contract) *Alchemy Dev* — 2026 – Present

- Build and ship web applications for Alchemy Dev and its clients across finance, logistics, and e-commerce
- Take each project from first scope through production

Computer Programmer (DRMD-DRIM Section Head) *Department of Social Welfare and Development* — 2024 – 2026

- Led the information management section supporting disaster response operations
- Architected and developed web-based tools for relief coordination, beneficiary tracking, and automated reporting
- Collaborated with cross-functional teams to streamline emergency data workflows

Information Technology Officer *Gingoog City Water District* — 2018 – 2024

- Managed end-to-end IT operations and infrastructure for the district utility
- Developed custom systems for billing, customer records management, and inventory tracking
- Streamlined internal workflows, improving operational efficiency and service reliability

Multimedia Officer *Axelum Resources Corporation (Coconut Milk Powder)* — 2017 – 2018

- Produced audio-visual training modules for employee onboarding, safety, and professional development

IT Staff / IT Officer *Mindanao Forge Company Inc.* — 2016 – 2017

- Provided IT support and infrastructure maintenance across the organization
- Designed and developed the company's first mobile e-commerce application

Software Developer Intern *Philippine Long Distance Telephone Company (PLDT)* — 2015 – 2016

- Contributed to internal tooling projects under senior developer mentorship
- Gained exposure to enterprise-grade software development practices and workflows

Freelance Web Developer *OnlineJobs.ph* — 2013 – 2019

- Delivered websites and web applications for international clients across diverse industries
- Managed full project lifecycles from requirements gathering through deployment

EDUCATION

BS Information Technology
Christ the King College — Graduated 2016

CORE STRENGTHS

- Full-Stack Development
- System Architecture
- API Design
- Performance Optimization

TECHNICAL SKILLS

FRONTEND

React · Next.js · Vue · Nuxt.js · TypeScript · JavaScript · HTML5 · CSS3 · Tailwind CSS · Redux · React Query · Framer Motion

BACKEND

Node.js · Express.js · NestJS · Python · Django · FastAPI · PHP · Laravel · REST APIs · GraphQL

DATABASE

PostgreSQL · MySQL · MongoDB · Redis · Prisma · Drizzle ORM · SQL · Database Design

TOOLS & DEVOPS

Git · GitHub · Docker · AWS · Vercel · CI/CD · Linux · Nginx · Jest · Playwright

CYBERSECURITY

Secure Coding · OWASP Top 10 · Authentication & Authorization · Access Control · SSL/TLS · Network Security

AI-ASSISTED DEVELOPMENT

Claude Code (CLI) · Cursor AI · Gemini · ChatGPT · AI Pair Programming · AI Code Review · AI-Assisted Refactoring · Edge-Case Discovery · AI-Assisted Documentation

SELECTED PROJECTS

LogisX

app.logisx.com

Dispatch and back-office platform for a trucking carrier. Loads come in from broker rate confirmations, then flow through driver dispatch with live GPS tracking, expenses, invoicing and an investor payout ledger.

Vue · Node.js · Express · Socket.IO · SQLite

Lendy.PH

app.lendyph.com

Cloud lending management system for Philippine cooperatives and lending businesses: borrowers, loan applications and approvals, payment schedules, collections and share capital in one platform.

Next.js · Laravel · MySQL · TypeScript

Vendora POS & E-Commerce

app.vendoraph.com

Point-of-sale and inventory system for retailers with an e-commerce storefront built in, on the web and on mobile.

Next.js · React Native · Laravel · MySQL

DROMIC Reporting System

dromic.dswd-caraga-drmd.online

Multi-level government reporting system for DSWD Caraga that tracks disaster incidents and consolidates impact reports from local government units.

Laravel · Vue · Inertia.js · TypeScript

DOX

dox.alchemydev.io

Broker-dealer intelligence platform for clearing-services teams, turning a live feed of regulatory filings into prospects worth calling.

Next.js · FastAPI · PostgreSQL · Better Auth

ECT Post Monitoring

ect-post-monitoring.abedubas.dev

Offline-first app for DSWD Caraga field surveyors who interview Emergency Cash Transfer beneficiaries after a disaster. It records GPS coordinates and attachments and syncs once the device is back online.

React · Vite PWA · Dexie · Laravel
